

16 July 2026

Hello again, Yasir Naqvi.

I had a dark laugh at your latest householder.

Is it that you're unaware current Liberal policy is we "can't afford" clean air and water and habitat?

Or is it that you told ChatGPT to make up some sentences that would appeal to voters, because truth is irrelevant to Liberal talking points?

Canada's new government is selling our environment, and it is killing humans and other species. That's your legacy.
